Technology, 2017

PROFILE

I'm Mary, a Design Systems advocate, Product Designer, and former front-end developer driven by a passion for enhancing a user's experiences with technology. I specialize in refining user journeys through experimentation and iterative design, aiming for delightful interactions.

WORK EXPERIENCE

Product Designer

Microsoft | *Industry Solutions redesign* | *AI Copilot* 2021 - 2024

Redesign of Microsoft sellers' Catalog website

- Focused on design system creation and UI/UX enhancement. Revitalized website aesthetics with color theory, effectively contributing to a visually cohesive palette aligned with the existing Microsoft Design principles.
- Collaborated with engineers to implement precise interaction design specifications, including hover states and smooth filtering. Effectively prototyping in Figma to further refine concepts for an enhanced user experience.
- Crafted user personas, conducted competitive analysis and revamped the website's information architecture, significantly improving navigational efficiency and enhancing the discoverability of seller assets.

UX Design for Catalog Copilot

- Oversaw UX design for the Catalog Copilot on the redesigned website, establishing guidelines and a framework for both Assistive (In-app, sidecar) and Immersive (full-screen) experiences, enabling content creation, collaboration, and in-product assistance.
- Created clear user flows to map out how users will navigate and interact with the copilot. Define the journey from entry points to desired outcomes.

UX Engineer

Microsoft | *OneDrive, Sharepoint* | *Microsoft Lists App* 2018 - 2021

- Designed, developed, and managed the UI/UX, web design, and front-end components for Fluent UI Design system, Microsoft's component library featuring 100+ components for web and mobile applications.
- Developed ReactJS and CSS-in-JS prototypes for A/B testing with existing customers ahead of the release of Microsoft Lists, leading craftsmanship as a vital link between design and engineering.

Co-founder

Terra-chain | Lead Designer 2018-2021

Lead designer for a stealth-mode blockchain real estate startup. Led initiatives spanning the product lifecycle, from customer discovery to initial product delivery. Established company logo design and brand colors. Developed and iterated on a pivotal product prototypes for customer acquisition and investor demos.
